The Cantilever Shoe

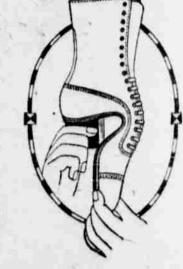

For Women Who Understand

Women have foot troubles because they don't stop to think that there is as much individuality in the foot as in the face or figure. A shoe that almost fits is like a hat that is almost becoming. It simply won't do.

There is a type of Cantilever Shoe here for every woman. It isn't merely a matter of selecting a shoe that is larger all over to avoid a particular point of misfit in a smaller shoe. It is a matter of an entirely different last and construction, which you won't have to be fitted to-because it will be fitted truly to you.

We should like to demonstrate here and in person the vital distinctions between the ordinary shoe and the Cantilever.

Two styles: High heel with narrow toe, low heel with wide toe. Black and brown kid, brown calfskin and white Nile cloth. Oxfords and lace shoes.
